Chapter 1: General Policy and Responsibilities

Quick Start Summary

1 Who needs to know about these requirements

The environment, safety, and health (ESH) policy information in this chapter applies to all personnel working at SLAC and, in particular, those with management authority for ESH.

The General Policy and Responsibilities: ESH Project Review Procedure (SLAC-I-720-0A24C-001) applies to line management, responsible persons, ESH coordinators, and reviewers involved in all proposed project (both experimental and conventional) activities at SLAC.

2 Why

To ensure ESH concerns are appropriately addressed in all activities at the SLAC National Accelerator Laboratory so as to protect workers, the public, and the environment.

3 What do I need to know

All work at SLAC must comply with applicable ESH requirements, which flow from the Environment, Safety and Health Policy. The project review procedure is provided to ensure the environment, safety, and health (ESH) aspects are adequately identified and mitigated before authorization and release of experimental and conventional project activities. Program- and process-level requirements are contained in the hazard-specific chapters of the ESH Manual.

4 When

These requirements take effect 30 July 2014.

5 Where do I find more information

SLAC Environment, Safety, and Health Manual (SLAC-I-720-0A29Z-001)
