

Stormwater: Best Management Practices Index

Department: Environmental Protection

Program: Stormwater

Owner: Program Manager, Darrin Gambelin

Authority: ES&H Manual, Chapter 26, Stormwater

SLAC's stormwater best management practices (BMPs) are grouped into categories. For each category there is a separate, numbered list keyed to an appendix of the stormwater pollution prevention plan (SWPPP).¹ (The SWPPP consolidates the requirements for each area as specified in the general permit.)

To find the BMPs that apply to your area

1. Find your work area in Stormwater: Industrial Activity Areas, Potential Pollutants, and Applicable BMPs²
2. Note all BMPs that apply to your area. BMPs are listed as [category.x]. For instance, a cafeteria BMP would take the form 15.x.
3. Locate each BMP in the list for that category

Table 1 BMP Lists
