Chapter 2: Work Planning and Control

Stop Work Form

When an imminent risk stop work has been issued, the supervisor (that is, the SLAC employee who authorized work) of the person whose work has been stopped must make sure this form is completed and observation recorded in as complete and objective a manner as possible. Upon request by the facility manager, ALD, or CSO, this form will also be used for non-imminent stop work.

When completed, copies of this form are to be sent to

1. Building / area manager
2. Division / department head
3. Directorate ESH coordinator
4. Associate laboratory director (ALD)
5. Chief safety officer (CSO)

Work may not be resumed until this form is signed, indicating re-authorization by the ALD and re-release by the building or area manager.

For additional information, see Work Planning and Control; Stop Work Procedure (SLAC-I-720-0A21C-003).
