Work Safely!

Define Work Scope

Identify and Analyze Hazards

ID work activity

ID and evaluate hazards

ID controls

Prepare ATA, JSA, Procedure or WIP

Authorize work

Develop and Implement Hazard Controls

Perform Work Within Controls

Release work

Pre-Job Briefing

Execute work

Be aware of unexpected events

Post-job review

Revise approach as needed

Feedback and Continuous Improvement
The 4 Key Questions at a Pre-Job Briefing

Ask yourself, your peers, and your supervisor:

1. What are the critical steps or phases of this task?
2. How can we make a mistake at that point?
3. What is the worst thing that can go wrong?
4. What controls are needed to prevent #2 and #3?
