#### **2. 2010 Annual Meeting and ideas for other public meetings**

The Annual meeting will be Monday August 30, 2010 in the Kavli Auditorium (afternoon).

At the meeting, we would like to have a talk about the results of the 2010 Decadal Survey. Other topics of interest include: reports from lab management and funding agencies, results from Atlas and Fermi, status of SuperB, advertisement of the FACET program

Other meetings to be discussed further: Accelerator Physics/FACET (see below), High School Teachers Outreach.

- 3. *Task force on the future of SLUO: status report on current progress***  
Working on Survey right now, should have report ready by the end of June. We will send out a reminder before the end of the month to see if we get more responses.
- 4. *Administrative support for SLUO and work to be done***  
Administrative support is sparse, no support for the web site; housing help is needed for users (we should bring this issues to the PPA management).
- 5. *NUFO annual meeting and NUFO representation***  
We need to find a volunteer to attend the annual meeting on June 7-9 in Brookhaven, NY.
- 6. *Status report on the 2010 DC trip (Bill Lockman)***  
Lisa Kaufmann and Grzegorz Madejski joined us for the report.  
Bill Lockman gave a presentation on the successful trip to DC.  
Bill is willing to chair next year, but needs help (Lisa is leaving SLAC). Anna would like to help with planning the trip for next year.  
Planning of trip needs to start earlier (maybe in the fall). More members of the exec should participate in the trip. It would be great if SLAC could host the preparation meeting with the other national laboratories.
- 7. *Meeting with Harvey Lynch about the SLUO budget for 2010***  
At this time we have about 1.5K left in the 2010 budget (3.5K were used for the Annual Meeting and 10K for the DC trip). There is no carry over. The new fiscal year starts Sept. 1.
- 8. *Discussion with Andrei Seryi about a possible collaboration with the ARD collaboration committee***  
The FACET users are members of SLUO (Accelerator research is explicitly mentioned in the SLUO charter).  
The SLUO exec would like to collaborate with the ARD collaboration committee in organizing a public meeting on accelerator science (October 2010 is the target date).
