

## Summer / Fall 2004 Downtime Safety Shutdown Summary

### Safety Shutdown

Due to an electrical accident at SLAC normal work has been suspended. A full site-wide shutdown began October 18<sup>th</sup> where all work activities were suspended. During this time all employees participated in safety meetings and completed numerous safety programs including safety related reading, group discussions, and attending specialized safety courses. On November 15<sup>th</sup> the suspension was lifted although extensive restrictions on most activities, especially field related, still exist.

Safety related documents for the Alignment Engineering Group (AEG) can be at the AEG homepage or by following this link:
