Javier, Peter:

I have decided that it will not be necessary to move the pull station in End Station-B. Keith is moving the wall mounted CO2 fire extinguishing appliance to the wall by the north exit and there is a telephone at that location. The current pull station location is not ideal but, it is within 100 feet of travel between two exits.

I will however, require it to be clear of any obstruction at all times.

Regards

RRR
